

A fantastical easy system to optimize your rates!

Features that matter

Data aggregation!

Historical and current level of bookings, competitor prices, market development, holidays, events, reviews, etc. are summarized for you.

Analyse!

The most important key figures are analysed in order to provide you with the perfect overview of your performance and the market.

Alerts!

Our software is observing the data constantly and gives warnings or hints when it comes to unusual deviations.

Forecasting!

Your historical data and external market influences enable us to calculate your future booking process.

Recommendations!

Our self-learning algorithms calculates the optimal price for your hotel on basis of this forecast.

Increase your revenue through better pricing decisions.

RATEBOARD

Revenue Management Software

RATEBOARD

Increase your revenue through better pricing decisions!

Designed for everyone!

Doesn't matter which prior knowledge you have, we have the right solution for beginners and experienced Revenue Managers.

- Effortless Revenue Management
- Intelligent price recommendations
- Average revenue increase of 8%
- Automation of rate management

Machine learning!

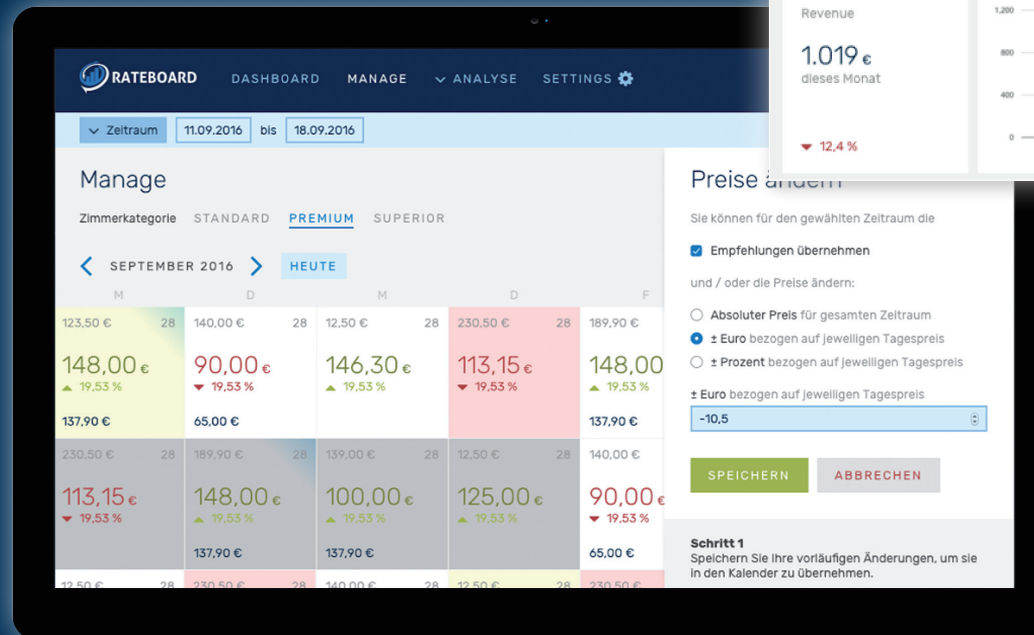

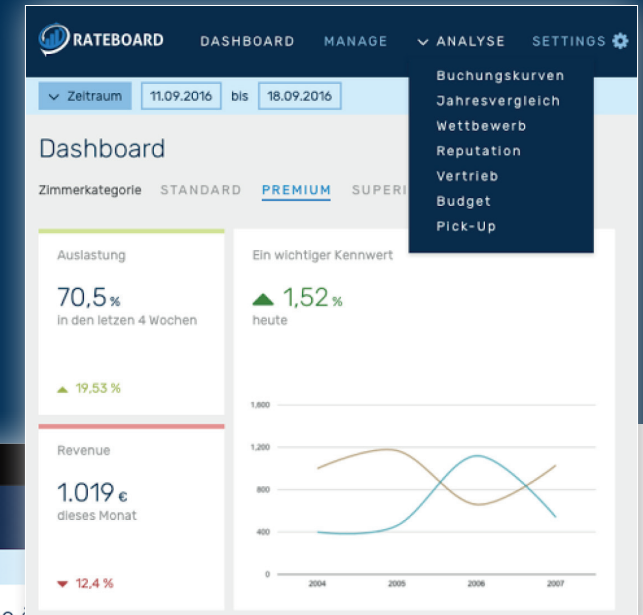

Rateboard extracts intelligent revenue insights through the deep analysis of big data to drive informed business decisions and simplify everyday tasks.

Simply simple!

We distinguish ourselves from the market and have created a user-friendly software, which is easy to try, buy and use.

All important data at one glance.

Get a quick overview on current trends, average prices and revenue per segment and country.

Rateboard is using a stable price algorithm which does not only take historical data from the PMS into consideration, but also competitor prices, market demand, holiday calendar, events, weather forecasts, reviews, etc.
